- it is the key word that you're looking in the automotive discussion this time, and we have it available to you on the blog , well we have collected a lot of data from the field directly and from many other blogs so very complete his discussion here about , on this blog we also have to provide the latest automotive information from all the brands associated with the automobile. ok please continue reading:

Two phones: Galaxy S8 and Galaxy S8 Plus? But that wouldn't mean Samsung would sell only one phone. Keeping up with a recent tradition, the Galaxy S8 could still come in two sizes. While some refer to it as the Galaxy S8 Edge, the larger of the two devices has another nickname, the Galaxy S8 Plus. Keep reading for more detailed sizes and hardware specs.

But it could tease the S8 on February 26 Samsung isn't showing up to Mobile World Congress empty-handed. The company is revealing a product believed to be the Samsung Galaxy Tab S3, and rumors are that Samsung will run an official video reel teasing the Galaxy S8. That event takes place on February 26 in Spain.

We also hear murmurs that Samsung might tell us when that Galaxy S8 event will actually be.

We'll be watching.

The Galaxy S8 might sell in mid-April

Rumors peg the sale date as April 14 or April 18, which would give customers time to preorder the phone before it ships.

There may be more to go around  
unpacked.jpgunpacked.jpg

[Enlarge Image](#)

The official press invitations.

Samsung

Samsung could ready 16 million total units of the Galaxy S8 phones for its first batch of sales, a sign that the company anticipates high demand. The rumor suggests that the smaller Galaxy S8 will account for 10 million of those and the remaining 6 million phones would be the larger S8 Plus.

Big, "bezel-less" displays

The Galaxy S8's face could be 85 percent or 90 percent screen, according to various reports like this one. That isn't just conjecture.

Longtime rival LG has announced that its "Full Vision" display, which allows for a much larger screen proportionate to the phone face, is coming to its LG G6, a phone that will launch at Mobile World Congress later this month.

Chinese phone maker Xiaomi is already selling its own version, the ceramic-backed Mi Mix.

5.8- and 6.2-inch screens

One rumor says that Samsung will be able to fit a 5.8-inch display into the S8 and a 6.2-inch screen on the S8 Edge/Plus. Both screen sizes are larger than the Note 7's 5.7-inch screen real estate, but the S8 is expected to have a smaller footprint than both the Note 7 and S8 Edge/Plus.

Autoplay: ON Autoplay: OFF

It could have an AI assistant named Bixby  
Filing a patent for a digital assistant named Bixby is a pretty good indicator that the Galaxy S8 will have the rumored Bixby assistant and maybe a female voice variant named Kestra. (Samsung bought AI startup Viv late last year.)  
Riding on the back of Samsung apparently trademarking the name Bixby Vision is the latest rumor that points to AI use in the camera.

Bixby is expected to:

Butlotit  
isdo  
with  
Google's  
increased  
control  
over  
the  
software  
and  
hardwareAs  
Apple  
has  
proven  
for

years you're controlling everything  
you  
can  
eke  
out  
more  
performance  
from handset process  
that  
is  
done  
by  
ensuring  
the  
hardware CPU  
RAM  
etc works  
seamlessly  
with  
the  
software  
Android  
Nougat  
Google  
knows  
Android  
better  
than  
anyone  
else  
and  
when  
you  
use  
the  
Pixel  
XL  
the  
command  
Google  
has  
over  
its  
OS  
becomes  
all  
the  
more  
clear Google

Pound  
for  
pound  
the  
specs  
aren't  
anythingget  
too  
excited  
about  
Yes  
the  
Pixel  
XL  
is  
onthe  
most  
powerful  
Android  
phones  
on  
the  
planet  
But  
so  
what?  
It'll  
be  
usurped  
next  
week  
by  
someone  
else  
That's  
just

how  
it  
worksthe  
Android  
space  
But  
what  
WILL  
separate  
the  
Pixel  
XL  
apart  
from  
the  
"other"  
Android  
phones  
is  
that  
its  
performance  
will  
ALWAYS  
be  
betterWhy?  
Simple:  
Google  
built  
this  
phoneclearly  
knows  
what  
it's  
doing  
as  
this  
phone  
feels  
about  
X  
faster  
than  
nearly  
every  
other  
Android  
phone  
I've  
tested  
this  
yearincluding  
the  
Samsung

Galaxy  
Note  
and  
HTC  
And  
the  
only  
reason  
thatcan  
thinkfor  
why  
this  
might  
be  
the  
case  
is  
the  
levelattention  
Google  
has  
put  
into  
developing  
this  
phone  
asseamless  
piecetechnologyThe  
traditional  
way  
Android  
phones  
are  
built  
isbit  
different:phone  
maker  
designs  
and  
buildsphone  
They

Handle payments.

Control native apps.

Identify object and text through the camera app.

Feature its own launch button (on the phone's right side).

Launch in seven or eight languages (that's more than Google Assistant).

Bye-bye, home button?

The Galaxy S8 could toss out its whole home button -- including the fingerprint reader -- and use on-screen navigation controls instead.

Another suggestion was that it could use an optical sensor that lives beneath the display.
